Office Action Summary	Application No. 10/619,534	Applicant(s) SMITH, JOSEPH	
	Examiner Kim M. Lewis	Art Unit 3772	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to because the sheet of drawings has a figure that is not labeled. Also, the applicant fails to point out or distinguish the
2. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

3. A series of singular dependent claims is permissible in which a dependent claim refers to a preceding claim which, in turn, refers to another preceding claim.

A claim which depends from a dependent claim should not be separated by any claim which does not also depend from said dependent claim. It should be kept in mind that a dependent claim may refer to any preceding independent claim. In general, applicant's sequence will not be changed. See MPEP § 608.01(n).

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a pressure concentrating means comprising a plurality of overlapping cylinder like shapes, does not reasonably provide enablement for a composite of overlapping cylinder like shapes and at least one pressure concentrating means since they are one in the same. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. Applicant's attention is directed to the last paragraph of page 4.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As regards claim 1, "the brace" lacks antecedent basis. Also, the phrase "cylinder-like" is indefinite in that it is unclear what the shape of the overlapping components are.

8. Claims 1-5 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure, which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3772

10. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 1,532,037 ("Cahill").

As regards claim 2, Cahill discloses a device that is capable of being placed in clothing (*i.e.*, worn underneath a jacket) that offers an enhanced support and comfort to individuals in the upper back area.

11. Claims 3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,535,495 ("Oldfield").

As regards claim 5, Oldfield discloses a back rest cushion that is anatomically configured to a seat or chair that provides increase focal support to the lumbar spine aiding to an enhanced comfort and stability (note col. 2, lines 64-66 and col. 3, lines 23-28).

The device of Oldfield is also an adaptable, ergonomically designed pillow for support and comfort for the head and neck while sleeping, and supports the low back when used on a chair or seat at home, in the car, or at work.

12. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. D401,758

As regards claim 4, Cook discloses a padded sock (a design) that provides increased focal support in the arch of the foot inferiorly and posteriorly of the foot.
